DETAILED ACTION

Election:

1. This application is a 371 of PCT/EP00/14654. For applications filed under 371, PCT rules for lack of unity apply.
2. This application contains inventions or groups of inventions which are not so linked as to form a single inventive concept. Under PCT Rule 13.1 the following combinations of claims of different categories are permissible and restriction to one of the following combinations is required:
 - I. Claims 1-15, 19-37 169-170, drawn to an isolated nucleic acid encoding the polypeptide comprising the amino acid sequence set forth in SEQ ID NO:6, an expression vector comprising said nucleic acid and comprising said vector, a host cell.
 - II. Claims 1-15, 19-37 169-170, drawn to an isolated nucleic acid encoding the polypeptide comprising the amino acid sequence set forth in SEQ ID NO:4, an expression vector comprising said nucleic acid and comprising said vector, a host cell.
 - III. Claims 1-15, 19-37 169-170, drawn to an isolated nucleic acid encoding the polypeptide comprising the amino acid sequence set forth in SEQ ID NO:37, an expression vector comprising said nucleic acid and comprising said vector, a host cell.

Pursuant to 37 C.F.R. 1.475(d), this Authority considers that the main invention in the instant application comprises the first-recited product, namely the nucleic acid encoding the polypeptide of SEQ ID NO:6, an expression vector

Art Unit: 1647

comprising said vector and a host cell comprising said vector. Further, pursuant to 37 C.F.R. 1.475(b)-(d), the ISA/US considers that the materially and functionally dissimilar products of groups II and III do not correspond to the main invention. This Authority therefore considers that the several inventions do not share a special technical feature within the meaning of PCT Rule 13.2 and thus do not relate to a single general inventive concept within the meaning of PCT Rule 13.1.

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art by their recognized divergent subject matter as defined by MPEP § 1850. Therefore, an initial lack of unity for examination purposes as indicated is proper.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
